CAREER OBJECTIVE

Aspiring Software Developer with strong foundation in **Java, Spring Boot, MySQL**, along with knowledge of **frontend technologies (HTML, CSS, JavaScript)**. Looking to contribute to full-stack application development while continuously improving coding and problem-solving skills.

TECHNICAL SKILLS.

Programming Languages: Java, Python, SQL

Frameworks & Libraries: Spring Boot, Flask

Databases: MySQL

Web Technologies: HTML, CSS, JavaScript

Tools & Platforms: Git, GitHub, Postman

INTERNSHIPS

Tap Academy — Java Full Stack Intern Oct 2025 – May 2026

Student Management System API – *Java, Spring Boot, MySQL, Postman*

- **Student Mgmt System:** Built a REST-based Student Management CRUD application using Spring Boot & MySQL with API-driven architecture; ensured structured request-response handling and data validation.
- **Backend & SQL:** Designed layered backend modules (Controller**,** Service**,** Repository) and implemented JPA-based database interactions, including CRUD operations and optimized queries
- **Code Quality:** Applied MVC architecture, Postman API testing, and modular coding practices; ensured maintainability through clean code structure and debugging.

SkillDizer — Data Science Intern Jun 2024 – Aug 2024

Stack: Python, Scikit-learn, Pandas, NumPy, Flask

- **ML Model:** Built a Loan Approval Prediction model on 15,000 rows; improved accuracy from 72% → 86% via SelectKBest feature selection and GridSearchCV hyperparameter tuning.
- **Pipeline & Metrics:** End-to-end preprocessing pipeline (missing values, encoding, scaling) cut training time ~30%; achieved ROC-AUC of 0.91 on test set.
- **Deployment:** Deployed trained model as a Flask web app enabling real-time loan eligibility scoring via browser interface.

PROJECTS

DSE Stock Price Prediction — Hidden Markov Model 2025

Stack: Python, hmmlearn, Pandas, NumPy, Streamlit / Flask

- **Stock Price Prediction (DSE):** Built a stock price prediction system using **Hidden Markov Models (HMM)** on Dhaka Stock Exchange data; analyzed historical trends to forecast future prices.
- **Modeling & Data Processing:** Engineered features like **price differences, fractional changes, and volume trends**; trained multiple HMM models for performance comparison and improved accuracy.
- **Deployment & Visualization:** Deployed the model using **Flask web framework** and integrated visualizations with **Matplotlib** to present predictions through a user-friendly interface.

EDUCATION

B.Tech — Computer Science & Engineering | Bapatla Engineering College, Bapatla CGPA 8.87 | 2022–2025

Diploma — Computer & Mechanical Engineering | Govt. Polytechnic College, Proddatur CGPA 8.45 | 2019–2022

SSC | Vikas Vidhya Vihar, Vinjamur GPA 9.5 | 2018–2019

CERTIFICATIONS & ACHIEVEMENTS

- **Deloitte Australia Data Analytics Simulation:** Forage — end-to-end data analysis & client presentation
- **Introduction to Selenium:** Simplilearn SkillUP — automated test scripting basics
- **Cisco Networking Academy — IT Essentials:** PC Hardware & Software fundamentals
